Weiqing Ren

Bibliography

1. Publications on the study of energy landscapes and rare events:

(1) *Numerical study of the effects of surface topography and chemistry on the wetting transition using the string method*
Y. Zhang and W. Ren

(2) *Numerical study of vapor condensation on patterned hydrophobic surfaces using the string method*
Y. Li and W. Ren
Langmuir **30**, 9567 (2014)

(3) *Wetting transition on patterned surfaces: transition states and energy barriers*
W. Ren
Langmuir **30**, 2879 (2014)

(4) *A climbing string method for saddle point search*
W. Ren and Eric Vanden-Eijnden

(5) *Computing transition rates of thermally activated events in dislocation dynamics*
C. Jin, Weiqing Ren and Y. Xiang
Scripta Materialia, **62**, 206 (2010)

(6) *Minimum action method for the Kardar-Parisi-Zhang equation*
H. C. Fogedby and Weiqing Ren

(7) *Phase slips in superconducting wires with nonuniform cross section: A numerical evaluation using the string method*
C. Qiu, T. Qian and Weiqing Ren

(8) *Application of the string method to the study of critical nuclei in capillary condensation*
C. Qiu, T. Qian and Weiqing Ren

(9) *Adaptive minimum action method for the study of rare events*
X. Zhou, Weiqing Ren and W. E

(10) *Simplified and improved string method for computing the minimum energy paths in barrier-crossing events*
W. E, Weiqing Ren and E. Vanden-Eijnden

(11) *Numerical study of metastability due to tunneling: The quantum string method*
T. Qian, Weiqing Ren, J. Shi, W. E and P. Sheng

(12) *Transition pathways in complex systems: Application of the finite-temperature string method to the alanine dipeptide*
Weiqing Ren, E. Vanden-Eijnden, P. Maragakis, and W. E

(13) Transition pathways in complex systems: Reaction coordinates, isocommittor surfaces, and transition Tubes
W. E, Weiqing Ren, and E. Vanden-Eijnden

(14) Finite temperature string method for the study of rare events
W. E, Weiqing Ren, and E. Vanden-Eijnden

(15) Current dissipation in thin superconducting wires: Accurate numerical evaluation using the string method
T. Qian, Weiqing Ren, and P. Sheng

(16) Minimal action method for the study of rare events
W. E, Weiqing Ren, and E. Vanden-Eijnden

(17) Energy landscape and thermally activated switching of submicron-sized ferromagnetic elements
W. E, Weiqing Ren, and E. Vanden-Eijnden

(18) Higher order numerical scheme in the string method for finding minimum energy paths and saddle points
Weiqing Ren

(19) String method for the study of rare events
W. E, Weiqing Ren, and E. Vanden-Eijnden

2. Publications on the moving contact line problem:

(1) Derivation of a continuum model and the energy law for moving contact lines with insoluble surfactants
Z. Zhang, S. Xu and W. Ren
Phys. Fluids 26, 062103 (2014)

(2) A level-set method for two-phase flows with moving contact line and insoluble surfactant
J.-J. Xu and W. Ren

(3) Contact line dynamics on heterogeneous surfaces
W. Ren and W. E
Phys. Fluids 23, 072103 (2011)

(4) Derivation of continuum models for the moving contact line problem based on thermodynamic principles
Weiqing Ren and W. E
Continuum models for the contact line problem
Weiqing Ren, D. Hu and W. E

Boundary conditions for the moving contact line problem
Weiqing Ren and W. E

The contact line dynamics on heterogeneous surfaces
Weiqing Ren and W. E
preprint

3. Publications on multiscale modeling and computation:

(1) A general strategy for designing seamless multiscale methods
W. E, Weiqing Ren and E. Vanden-Eijnden

(2) Sequential multiscale modeling using sparse representation
C. García-Cervera, Weiqing Ren, J. Lu and W. E

(3) Seamless multiscale modeling of complex fluids using fiber bundle dynamics
Weiqing Ren

(4) Analytical and numerical study of coupled atomistic-continuum methods for fluids
Weiqing Ren

(5) Heterogeneous multiscale methods: A review
W. E, B. Engquist, X. Li, Weiqing Ren and E. Vanden-Eijnden

(6) Heterogeneous multiscale method for the modeling of complex fluids and micro fluidics
Weiqing Ren and W. E

4. Publications on adaptive mesh methods and applications:

(1) Numerical simulation of self-focusing of ultrafast laser pulse
G. Fibich, Weiqing Ren, and X. P. Wang

(2) A new adaptive grid method based on iterative grid redistribution
Weiqing Ren, X. P. Wang
Methods and Application of Analysis 8, 515 (2001)

(3) An iterative grid redistribution method for singular problems in multiple dimensions
Weiqing Ren, X. P. Wang

5. Numerical linear algebra:

(1) Stability of the matrix factorization for solving block tridiagonal symmetric indefinite
linear systems
J. Zhao, W. Wang, and Weiqing Ren

(2) Iterative methods with preconditioners for indefinite systems
Weiqing Ren, and J. Zhao
